**We met Alice Adong, a six-year old girl, whose father was killed by the LRA in a road ambush in 1999.**

**After the death of her father, Alice's mother was raped by a government soldier and it was found out that she had been infected by HIV/AIDS.**

**Her mother died last year of HIV/AIDS; she is now looking after her younger brother, aged four , with no help from any adult.**

**Alice and her brother John are not the only children looking after each other.**

**The war situation and HIV/AIDS have left a lot of orphans**
